Level of Star Con.

A CARLOAD TAKEN OUT YES-TERDAY MORNING.

The most sensational rise in the price of Star Consolidated stock during the past few days has been the cause of brokers', \$4.00, activity among brokers than has een witnessed in this city for many a ong day, and when Manager Milan Packard appeared on the streets yesterday after a trip south, and gave pariculars of a strike just made on the 400 level, the street went wild, and made in less than an hour after call at better than \$1 a share.

at better than \$1 a share.

The sidewalk in front of the exchange during the afternoon was crowded with brokers, and those doing business through them, and the whole burden of their song was Star Consolidated. Sales were being made every minute for a long time, and when it came time to disperse for dinner sales had been made at prices as high as \$1.17½, and few there were who would sell under \$1.20.

That the mine has made a wonderful record under "Sheep Herder" Packard's direction no one can now deny,

ful record under "Sheep Herder" Packard's direction no one can now deny,
and that its production is not now all
of fifty tons per day is due solely to the
fact that Mr. Packard cannot get cars
fast enough to load that amount.
Speaking of the latest strike and the
condition of the mine in general, Manager Packard said yesterday afternoon: "I have been taiking with my
son at the mine, and he tells me that
when the ore was struck on the 400
level Wednesday afternoon, the men
picked a hole into it, and from the
rock taken out assays were made.
They gave returns of five ounces in
gold. This morning, my son states, a
full carload of cre from that level has
been broken down and noisted to the
surface, and from all appearances the
strike is better and bivery if receible been broken down and noisted to the surface, and from all appearances the strike is better and bigger, if possible, than shown either on the 200 or 300 levels."

Mr. Packard also stated that the two

han showle craiser of the evels."

Mr. Packard also stated that the two ipper levels were looking better than ever, and he said that five cars of rock from the 200 would be on the market today. Ore could be taken out much faster than is now being done, as the miners are working in it at five different places, but there was little use, he said, in raising it faster than cars can be secured to haul it to marcars can be secured to haul it to market to the contract for erecting twenty new dwelling houses at the Sunnyside Cos amp has been awarded to Sam C. the Tintic district, and they are all of becoming one of the greatest bonan-

It is not many weeks ago that Star tould be bought for 12c or 15c a share, and the oracles are now placing the limit of its advance at \$2, and that figure may yet prove too low by half.

N. B. WHITE AND THE STAR CO.

Mine Takes On a New Aspect.

office at Washington has reversed the decision of the register and receiver in the case of Nathan B. White vs. the Star Gold & Silver Mining company, the case being now decided in Mr. White's favor. This case involves an application for patent made by the Star Gold & Silver Mining company for a number of mining claims situated in the West Mountain mining district, Tooele county.

NEW YORK RAPID TRANSIT ROAD ADOPTS PLANS.

Duct Will Extend From Gotham's City Hall Under East River to

Tooele county.

On April 7, 1900, Nathan B. White filed a protest against the issuance of a United States patent, alleging a relocation of the property and superior and better right to the ground involved. The Star Gold & Silver Mining company set up an answer to the effect that the company was deceived and mislead by one Moffatt, president of the company, in informing the board of directors that patent had been duly issued on said application some two id application some two
It is further alleged that
assessment work had been

duly kept up, as required by law.

The victory that Mr. White has achieved in canceling the present application of the Star Gold & Silver Mining company's enables him to have the company's enables him to have the matter brought before the state courts and have their respective right determined. While, if the application had been granted, Mr. White would have been entirely eliminated from the case.

Mr. White was represented by Attorney E. W. Senior, and the Star Gold & Silver Mining company by Tweet. Silver Mining company by Twomey & Twomey, in connection with L. H.

SILVER UP AGAIN.

It Passed the 63c Mark Yester-

Silver passed the 63c mark vesterday, the New York quotation on the white metal being 63%c per ounce. It white metal being 55% per ounce. It has never been that high since April 28, 1899, just seventeen months ago. The day previous to that it went to 63%. It did not hold up long, however, for a glance at the record shows that within a couple of weeks it was back to 60c, and around and below that mark it hovered until a few weeks ago.

ORE BUYING IN THE NORTH.

hovered until a few weeks ago.

W. Mont. Ferry Tells of the Methods in British Columbia.

W. Mont Ferry returned from a sev eral days' trip to Rossland and Nelson, British Columbia, yesterday. The gen-tleman reports that the mining companies which a few months ago shut

Nelson, which is something like sixty or seventy miles northeast of Rossland, Mr. Ferry says, is by far the nicer place, though it is a strictly English town. Its population is about 15,000. The streets are nicely paved, it has an electric car line and the whole place is kept clean and tidy. It is the smelting point for all the properties within a radius of ten miles or more and a heavy tonnage now finds its way there.

within a radius of ten miles of mote and a heavy tonnage now finds its way there.

The basis of settlement is altogether different from here, however, and though the producer in this country may feel badly imposed upon, he is not nearly as badly off as the producer across the border. The smelter at Nelson does not allow for the lead in ores unless it runs over 3 per cent, and it is then paid for only on the Spanish quotation, which gives them about \$2.40 per 100 pounds. The London quotation on silver rules. No allowances are made for excesses in iron or lime, but a penalty attaches to silica above a certain per cent, just the same.

The system there, Mr. Ferry says,

a penalty attaches to silica above a certain per cent, just the same.

The system there, Mr. Ferry says, has one redeeming feature—the small and intermittent shipper gets just as much for his ore as though he produced a large tonnage and sold it under contract. In other words, there is no discrimination at all by the smelter company.

company.

At Rossland, Mr. Ferry says, the community and mines all bear the earmarks of Americanism and Yankee methods. The Le Roy, the biggest proposition there, is producing about 700 tons of \$16 gold rock per day and the company hats about \$8. The propile gold rock per day and sity main building, corne nets about \$8. The prop- and Second West streets.

from the city hall, Manhattan, to the Battery, across the East river to the foot of Joralemon street, Brooklyn, thence to the old city hall, thence to Flathush avenue thence to the Long Flatbush avenue, thence to the Long Island railroad station at Flatbush and Atlantic avenue. There the tunnel will terminate for the present.

The route is the one favored by Controller Coler, who has made an estimate that the cost of construction of the tunnel will be about \$6,000,000.

ABANDONED BY PILOT.

Training Ship Hawk Runs Aground Near Montreal.

Montreal, Sept. 27.-The U.S. training ship Hawk, which is on its way to Cleveland, ran sshore last evening as it came out of the Lachine camal, nine miles above here.

The commander of the Hawk engaged

The commander of the Hawk engaged a pilot before leaving Montreal. After they had reached the last lock in the Lachine canal the pilot jumped out on the lock and said he was going home to get his coat, as he lived near by. They waited a long time for him, but as he did not return, the commander decided to go ahead, according to the chart. The boat ran aground as soon as she got out of the canal.

A fug has tried to get the Hawk off

A tug has tried to get the Hawk off, but thus far unsuccessfully.

HAY IS NEARLY WELL.

Secretary Will Return to Washington Next Week

Washington, Sept. 27.-The health of Secretary of State Hay has improved rapidly of late, and it is expected that he will return to Washington early next week and resume the duties of his office, relieving Dr. Hill, the acting secretary, who has been suffering from a malarial attack.

Assistant Secretary Adee said today that Secretary Hay has been in constant communication with the departonally shaped the Chinese negotiations in that period.

"Hunger Is the Best Sauce," yet some people are never hungry. Whatever they eat has to be "forced down." There is, of course, something wrong with these people. By taking Hood's Sarsaparilla a short time they

are given an appetite, and then they enjoy eating and food nourishes them. If you find your appetite falling, just try a bottle of Hood's. It is a true stomach tonic, and every lose does good.
